

Mathematics 10C
Peer Coaching Tool – Option #2
Rocky Road

Student _____ **Coach** _____

Instructions for the Coach: Using the questions below, interview a classmate about the task in progress. Provide feedback to help the student clarify the message.

Here are some questions to ask your partner:

?	How does your description explicitly match the graph given in Part 1? What are some examples of precise mathematical language in your description?
?	Where in your explanation have you demonstrated your understanding of slope as rate of change?
?	How did you determine the equation of the line? Have you included supporting work and calculations?
?	How does your graph explicitly connect to the story you told in Part 3?
!	Here are some suggestions for improvement.

Instructions for the Student: Consider the usefulness of the feedback you received.

Based on my coach's feedback and my self-reflection, this is how I will improve my task:
