

Mathematics 10-3
Peer Coaching Tool – Using Proportionate Reasoning
to Calculate the Length of the Fence
Good Fences Make Good Neighbours

Find a classmate to help you practice. One person asks the questions and the other person gives the answers. Then switch jobs.

Here are some questions to ask your classmate.

	How is it possible to compare the lengths provided in different units?
	How does the fence length compare to the number of panels used to build the fence?
	How did the measurements that were provided compare to the actual length of the fence?
