

Mathematics 20-1
Peer Coaching Tool – Identify and Explain Assumptions
A New Arena

Have a conversation with a classmate about the choices and assumptions made in the completion of the arena task. Here are some questions to ask your classmate. Switch roles after asking your classmate these questions.

| | |
|---|--|
|  | What did you consider when deciding how many seats should be in the first and last rows? Have you communicated these considerations in your finished task? |
|  | What did you consider when deciding how much to charge for each seat in each row? Have you communicated these considerations in your finished task? |
|  | Here are some suggestions to improve this part of your task. |
